

Datasheet for Earth Leakage Monitoring

Input module **IsoHub**

IsoHub

for earth leakage systems monitoring
up to 128 channels

Article number: 670424
Aux supply: 12/24VDC
Inputs from CTs: 16
Dimensions: W x H x D 135 x 92 x 25 mm
Weight: 0,25 kgs
Recommended cable FKAR-PG 2x2x0,5 mm²
Delivered with connection plints

Use with our wide
range of residual
current transformers.

Application

Up to 8 IsoHub units can be connected to the IsoBase acting as system master, giving a total of 128 channels.

With the free location of IsoHub you will have an easy installation that reduces the cost for the system.

IsoBase displays the leakage current values (TRMS), filtered values (50/60 Hz) and THD from all monitored channels directly in mA and in percentage of set level for alarm.

See datasheet for IsoBase for further information
