

# ATyS g Automatic Transfer Switching Equipment from 125 to 3200 A

#### **Function**

**ATyS g** are 3 or 4 pole automatic transfer switches, with positive break indication. They incorporate all the functions offered by the ATyS r, as well as functions intended for **mains/mains** and **mains/genset** applications.

In automatic mode they enable the monitoring of, and the on-load changeover between, two power supply sources, in accordance with the parameters configured via potentiometers and DIP switches. Remote monitoring of the ATyS g is possible with the optional RS485 communication module

They are intended for use in low voltage power supply systems where a brief interruption of the load supply is acceptable during transfer.

#### Advantages

#### Rapid commissioning

ATyS g switches offer significant time saving during commissioning (process takes 2 to 3 minutes). Owing to the design that allows commissioning through just four potentiometers and four DIP switches, a screwdriver is all that is required to configure the parameters.

For added simplicity, they also offer an autoconfiguration function which enables automatic adjustment of the rated voltage and frequency.

# Specifically designed for mains/mains and mains/genset applications

The ATyS g's integrated controller has been designed to provide specific functions for these applications (genset startup, on-load or off-load tests...) together with the monitoring of the voltage and frequency of both sources for three-phase and single-phase networks. The generator supply must be connected to switch II, located at the rear.

#### RS845 communication

An optional RS485 communication module (p/n 4825 0092) can be fitted to the AtyS g controller.

It allows remote monitoring of available power sources and their parameters, timers, as well as displaying the product's status and configuration.

Communication speed is up to 38400 bauds.

#### The solution for

Mains/mains and mains/genset applications

#### Strong points

- > Rapid commissioning
- ATS with integrated DPS and controller for functions dedicated to mains/mains or mains/genset applications

#### **Conformity to standards**

- > IEC 60947-6-1
- > IEC 60947-3
- > GB/T 14048.11

#### Approvals and certifications(1)

(1) Product references on request.

#### **Enclosed RTSE**

See "Enclosed transfer switches".
