

# DIRIS Digiware IO

Digital and analogue input/output modules  
for the DIRIS Digiware system

**DIRIS Digiware IO-10**  
4 digital inputs/2 digital outputs

**DIRIS Digiware IO-20**  
2 analogue inputs

## Function

- DIRIS Digiware IO-10 modules have 4 digital inputs and 2 digital outputs. The 4 digital inputs can be used to monitor the status of protection devices and drawers (ON/OFF, trip counter) or to collect pulses from multi-fluid meters. The 2 digital outputs enable remote control of switching devices by sending an On/Off output signal. Alarms can be configured and generated on the digital outputs.
- Thanks to their 2 analogue inputs, DIRIS Digiware IO-20 modules can collect data from analogue sensors (pressure, humidity, temperature, etc.). All the information collected by the IO-10 and IO-20 modules can be viewed on DIRIS Digiware D-xx displays and on Webview, the web server embedded in DIRIS G gateways and in the DIRIS Digiware D-70 display unit.

## Advantages

### Plug & Play

The IO modules can be easily added anywhere within the measurement system thanks to a quick RJ45 connection.

### Multifunction

The combination of voltage measuring modules, current measuring modules, and input/output modules makes DIRIS Digiware a complete and versatile system.

### Web server

All the reported information is accessible from the displays, from Webview or any other centralised management software.

### Compact

The modular format enables quick connection of a large number of IO-10 and IO-20 modules.

## General characteristics

- IO-10: 2 digital inputs for circuit breaker status (position and trip) or pulse collection from multi-purpose sensors.
- IO-20: 2 analogue inputs to monitor analogue sensors and fluid levels.
- Display of electrical measurements
- Digiware D-xx and WEBVIEW.

## The solution for

- > Healthcare

## Strong points

- > Plug & Play
- > Multifunction
- > Web server
- > Compact

## Conformity to standards

- > IEC 61557-12

- > UL 61010  
Guide PICQ  
File E257746

## Technical characteristics

### Measurement characteristics

#### Digital inputs/outputs- DIRIS Digiware IO-10

Number of inputs	4
Type/power supply	Insulated input, internal bias 12 VDC max., 3 mA
Input function	- Logical status - Status of the circuit breaker, of the drawer (ON/OFF, trip counter) - Pulse counter
Number of outputs	2
Type	Insulated output, 48 VDC max., 50 mA and 24 VAC max.
Output function	- Remote control of status - Alarm signal linked to the inputs (exceeded thresholds, status, etc.)
Input / output connection	Removable screw terminal block, 9 positions (5 dedicated to inputs, 4 dedicated to outputs) Stranded or solid 0.14 to 1.5 mm <sup>2</sup> cable

#### Analogue inputs - DIRIS Digiware IO-20

Number of inputs	2
Type/power supply	0/4-20 mA, 200 Ω max
Accuracy	0.5% full scale
Function	Connection of analogue sensors (pressure, humidity, temperature...) with choice of interpolation (linear or quadratic)
Input connection	Removable screw terminal block 2x2 positions, Stranded or solid 0.14 to 1.5 mm <sup>2</sup> cable
